VETERANS' HOUSING IN RURAL AREAS, SMALL CITIES, AND TOWNS

The VA guaranteed home loan program is designed to assist veterans in the purchase of a home or the purchase of a farm with a farm home, in most rural areas, small cities, and towns.

In order to provide an equitable opportunity for some of the veterans living in the rural areas, small cities, and towns of our country to purchase a home, the VA direct loan program was authorized by Public Law 475, 81st Congress, approved April 20, 1950.

HISTORY OF THE DIRECT LOAN PROGRAM LEGISLATION

The direct loan program as authorized by the Servicemen's Readjustment Act, as amended, has been extended from year to year for financial assistance to those veterans living in rural areas, or in small cities and towns not near large metropolitan areas, where other types of financing are not available. The direct loan program, as originally authorized, was to extend from July 19, 1950, to June 30, 1951, and empowered the Administrator to make direct loans up to $150 million (Public Law 475, 81st Cong., approved April 20, 1950). After expiring, on June 30, 1951, the program was renewed on September 1, 1951, on a revolving-fund basis, limited to $150 million outstanding at any one time and extended the program to June 30, 1953 (Public Law 139, 82d Cong.). The revolving fund included the unreserved portion of the original $150 million fund allocation, plus the increment from loan repayments, and the proceeds of sales of direct loans to private investors. The revolving fund was augmented in April 1952 by an additional allocation of up to $125 million, to be made available by the Secretary of the Treasury in quarterly installments of $25 million, less the proceeds of direct-loan sales in the preceding quarter (Public Law 325, 82d Cong.). Under provisions of Public Law 101, 83d Congress, approved July 1, 1953, the program was continued for 1 year, to June 30, 1954, with up to $100 million added to the revolving fund, to be made available in quarterly installments, and the maximum interest rate on direct loans was raised to conform to the rate on guaranteed loans. The program was again continued for 1 year, ending June 30, 1955, by Public Law 438, 83d Congress, approved June 29, 1954. Public Law 88, 84th Congress, approved June 21, 1955, revised the program and extended the program for 2 years, expiring June 30, 1957. Public Law 1020, 84th Congress (Housing Act of 1956), approved August 7, 1956, extended the program for 1 year from July 1, 1957, to June 30, 1958, but failed to appropriate funds for the extended period.

VETERANS UNABLE TO OBTAIN LOANS

The committee made a survey throughout the country of the inequity of opportunity and found that of 3,234,438 veterans living

in 1,635 rural counties, less than 10 percent had obtained a loan to purchase a home. This compares with 2,857,307 veterans residing in 126 metropolitan counties where over 40 percent have obtained a guaranteed loan.

The committee found that the administration of the direct loan program was such that it was almost impossible for a veteran to build a new home in a direct loan area. Approximately 80 percent of the direct loans were for the purchase of old and existing homes. The committee further found that veterans were unable to buy a farm and farm home with the aid of a VA direct loan because the Veterans' Administration required the veteran to obtain at least 60 percent of his income from farming operations. This was not the intent of Congress.

To correct this situation and clearly establish the intent of the committee and Congress, the committee reported H. R. 4602, which was approved by the Congress.

H.R. 4602 VETOED

H.R. 4602, approved by Congress, established the intent of Congress on direct loans, extended the program to July 25, 1958, provided $150 million for the year's extension, and increased the maximum amount of a direct loan from $10,000 to $13,500. However, the President vetoed the bill on September 2, 1957.

PUBLIC LAW 85-364

Public Law 85-364, approved April 1, 1958, contained all the provisions of H.R. 4602, extended the program 2 years, from June 30, 1958, to July 25, 1960, and provided $150 million for each year of the 2-year extension. Public Law 85-364 also increased the maximum interest rate the Administrator of Veterans' Affairs could set on guaranteed and direct loans. The maximum is set at 4¾ percent, but is also tied to the interest rate set for loans under section 203(b)(5) of the National Housing Act, in that the rate cannot be higher than 4¾ percent, or one-half of 1 percent below the rate on type 203(b)(5) loans, whichever is the lower.

NEW DIRECT LOAN PROGRAM

It was the intent of the committee and Congress that new rules and regulations be established by the Veterans' Administration for the direct loan program which would enable builders to participate in the program in rural areas, small cities, and towns. The new program would also assist veterans to purchase a farm with a farm home, to purchase a farm and build a home on the farm, to build a home on a farm already owned, or to repair and remodel a home or farm home.

The intent was carried out, in detail, through the new rules and regulations issued by the Veterans' Administration on April 16, 1958.

PRESENT-DAY WAITING LIST

On April 1, 1958, the day the present law was signed by the President, there were 13,084 veterans on the waiting lists of the Veterans' Administration regional offices for a direct loan. The Veterans'

Administration received the first funds under Public Law 85-364 on April 4, 1958. This $50 million was allocated to the regional offices with instructions to try to take care of the veterans who were on the waiting list as of April 1, 1958. Veterans who had applied after that date were to be placed on a new waiting list which could not be taken care of until the next allotment was received.

Veterans' Administration records indicate that 50 percent of the veterans who make application for a direct loan do not want one by the time their name reaches the top of the waiting list and funds are available to them. In many cases the veteran no longer desires the direct loan because he has obtained a loan elsewhere or there has been a change in his plans. In too many cases, however, the house he wanted has already been sold. The average amount of a direct loan is $9,044. If only 50 percent of the 13,084 veterans on the waiting list as of April 1, 1958, actually wanted a loan, it would have taken $65.42 million to make loans to the 6,542 veterans. However, only $50 million was available. Using the 50-percent figure, this would mean that 1,542 veterans had to remain on the waiting list until the next funds were received.

Veterans' Administration records indicate that on December 1, 1958, there were 41,025 veterans on the direct loan waiting list. The $50 million quarterly allotment will, if the average amount of a loan is $9,044, provide loans for only 5,000 veterans.

It is evident that additional funds must be made available if direct loans are to be provided the veterans who desire and are entitled to them.

If only 50 percent of the veterans on the waiting list still desire home loans by the time theirs is reached, it will take $216 million to eliminate the waiting list of 41,025 veterans.

Under the present law, the Veterans' Administration drew $50 million in January 1959, which will be the only funds for direct loans until July 1, 1959. This amount will make only 5,000 loans. The $50 million will be allocated to the VA regional offices and earmarked for the veterans on top of the list. This will leave over 36,000 veterans on the waiting list, who will have to wait until July 1, 1959, for a home loan—if the home they want is still available—and then only the top 5,000 veterans on the waiting list will be able to obtain a loan.

NEW HOMES

The new direct loan program has provided new homes for veterans in rural areas, small cities, and towns. Direct loans for old and existing homes have been reduced from 80 to 55 percent and loans for new homes have increased from 20 to 45 percent of the direct loans made. Also, farms with a farm home have been purchased with a direct loan as well as new homes have been built on farms already owned by veterans.

CHARTS

The following charts show how the direct loan program has functioned from April 1 to December 1, 1958. For comparison, the figures on the guaranteed home loan program are shown for the period July through November 1958.

National totals

Direct loans, Apr. 1 to Dec. 1, 1958								Guaranteed loans, July through November 1958	Veteran population	Veterans on waiting list for direct loan
